Team Roles and Responsibilities

Introduction

The development of the Student and Faculty Achievement Portal was undertaken by a three-member team operating under the team name Code Spartans. The team was structured to ensure clear ownership across the three principal layers of the system, namely the frontend and system integration layer, the backend and database layer, and the verification, administration, and testing layer. Each member was assigned a distinct set of responsibilities and modules corresponding to their designated role, enabling parallel development while maintaining consistency and coherence across the final integrated system. The following subsections describe the individual roles, responsibilities, and modules owned by each team member.

1. Kiran Kumar V

Roll Number: 7376242IT199

Role: Team Leader | Frontend Lead | System Integration & Presentation

Responsibilities

- Designing the overall system architecture
- Creating the UI/UX design for all application pages
- Developing the responsive frontend of the application
- Integrating the frontend with backend services
- Building the Student, Faculty, and Admin dashboards
- Implementing analytics and dashboard visualizations
- Managing the GitHub repository and overseeing project integration
- Preparing the project presentation and final demonstration

Modules Owned

- Authentication UI
- User Profile
- Student Dashboard
- Faculty Dashboard
- Admin Dashboard
- Analytics Dashboard
- Student Achievement Portfolio
- Final System Integration

---

2. Praveen Kumar J

Roll Number: 7376242IT258

Role: Backend & Database Developer

Responsibilities

- Designing the database schema
- Developing backend services
- Implementing authentication logic
- Creating database operations
- Developing Achievement CRUD functionality
- Implementing reward point calculation logic
- Establishing database connectivity
- Ensuring data validation and integrity

Modules Owned

- Authentication Backend
- Achievement Submission
- Reward Point Management
- Database Design
- API Integration
- Backend Logic

---

3. Rithickroshan C

Roll Number: 7376242IT274

Role: Verification, Admin & Testing Lead

Responsibilities

- Developing the faculty approval workflow
- Implementing the Admin Panel
- Developing the notification system
- Generating reports
- Conducting testing and debugging
- Preparing project documentation
- Providing deployment support

Modules Owned

- Faculty Verification
- Admin Management
- Notifications
- Reports
- Testing
- Deployment

Team Summary

Team Member	Roll Number	Role	Primary Responsibility
Kiran Kumar V	7376242IT199	Team Leader | Frontend Lead | System Integration & Presentation	Frontend development, UI/UX design, and overall system integration
Praveen Kumar J	7376242IT258	Backend & Database Developer	Database design and backend service development
Rithickroshan C	7376242IT274	Verification, Admin & Testing Lead	Faculty approval workflow, admin panel, and testing

Conclusion

The successful development of the Student and Faculty Achievement Portal reflects the coordinated efforts of the Code Spartans team, with each member contributing focused expertise to a distinct area of the system while remaining aligned with the shared objectives of the project. The clear division of responsibilities across frontend development and system integration, backend and database engineering, and verification, administration, and testing enabled efficient parallel progress and minimized overlap in effort. Regular collaboration and integration among the members ensured that the individually developed modules came together into a cohesive, fully functional system, demonstrating the value of structured teamwork in the successful completion of the project.
